DETAILED ACTION***Election/Restrictions***

1. Applicant's election of invention I (claims 1-5) in the reply filed on November 1, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

2. Claims 6-10 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on November 1, 2004.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the adapter (claims 1-2) and garment (claims 3-5) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining

figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

4. Claims 4 and 5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 4 and 5 appear to depend from claim 3, but the preambles of claims 4 and 5 do not appear to correspond to the invention of claim 3. Additionally, claims 4 and 5 further refer to claims 1 or 2, compounding the lack of clarity in the claim. Presumably, the garment of claim 3 is customizable by use of an adapter, the adapter selectively receiving a mass element via a mass carrier, wherein for claim 5, the mass carrier comprises a body having a plurality of spaced openings suited for selective receipt of a mass element.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-6, as best understood by the Examiner, are rejected under 35 U.S.C. 102(b) as being anticipated by *Jackson, Jr.* (US Pat. 3,759,510). *Jackson, Jr.* discloses a composite exercise garment including various components detachably connected together for use either as a total composite garment, or for use separately or in various combinations, each component of the total garment having exterior pockets which may be either filled or partially filled with weight materials, with the object that by using the proper components of the garment, properly weighted, and performing specified movements, exercises of any desired degree of difficulty are provided for any desired muscles or sets of muscles.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Prince (US Pat. 4,384,369), *Fox, III* (US Pat. 4,953,856), *Cebo-Johnson* (US Pat. 5,553,322), *Raines* (US Pat. 5,937,441), *Cook* (US Pat. 6,200,244 B1) and *Giering* (DE 35 32 512 A1) disclose various means for securing selected amounts of weight to a user's body.
